- Number of items: 74
- Passing Criteria: 70%
- Time Allocated: 105 minutes

Exam Preparation

These study materials are not required to pass the certification exam. They are simply exam preparation materials of which we are aware. Please refer to your regional websites for information on how to register for the courses below.

- Industry Standard Architecture and Technology, September 2007, #36939 - ILT, Instructor Led training or available as Self-Study download
Available Study Materials

This certification test was developed to test your knowledge and skill of Supporting Industry Standard Servers in areas such as multi-processor, SCSI and RAID configurations and also operational issues such as backup/restore and disaster recovery. We highly recommend that you participate in the applicable training course. We also recommend that you have 18-24 months server experience before you take the exam.

Sample Exam Items

The following examples represent the types of items and question formats that you could see on the exam. These are generic samples and do not reflect the content being tested.

1. Which planet is closest to the Earth?
   A. Mars
   B. Pluto
   C. Venus
   D. Saturn

2. Which planets are “inner planets” — planets found within the asteroid belt? Select TWO.
   A. Pluto
   B. Earth
   C. Neptune
   D. Mercury
   E. Venus
3. Click the Exhibit button.

What is this constellation called?

A. Leo
