Opt-out policy

You now have the option to no longer receive these monthly newsletters as well as other HP Certified Professional communications. If you would not like to receive these communications, you can "opt out," by following the steps below:

1. Log into your HP Certified Professional Profile. If you need help logging in, please visit our Login Assistance page on the Participation Guide at www.hp.com/certification/americas/online_guide/access.html.
2. Once logged in, select the Change My Profile (New Employer, Address Changes, Email, Etc.) link.
3. The different communications you can choose from is listed below your email address field. Just uncheck the boxes of the items which you don't want to receive from HP.

All HP Certified Professionals will receive Program Update information as well as Continuing Certification Requirements (CCRs) communications. There is no "opt out" option for Program Updates and CCR communications.

Program information

Your annual technical training event is almost here
HP Technology Forum 2006 is just around the corner - September 17-21 in Houston, Texas. Now is the time to register if you plan to attend.

Revamped ProCurve credentials provide flexibility to allow for specializations in security, mobility and convergence
New ProCurve credentials move away from a "one size fits all" offering and now provide more flexibility to allow "specializations" in key areas such as security, mobility and convergence. Specializations are available in both the ASE and Master ASE credentials.

Online HP Certified Professional Certification application - No longer required
The Americas HP Certified Professional Program has discontinued the requirement of completing an online application as part of the certification process. The process change was implemented due to ongoing feedback from certification candidates and the existing certification community.

» Full story

Credential status definitions
The Program Office uses four categories to define a credential status: Active, transitional, inactive and expired. Learn more about these status definitions.

» Full story

New credentials launched
The following new credentials have been added to the Americas HP Certified Professional portfolio. All requirements for these new credentials are located on the Americas certification website.

» Full story

Inactive credentials
With the implementation of the new Credential Upgrade Path process (credential versions), several credentials now have an inactive status. All HP Certified Professionals are encouraged to transition to the latest version of the credential they have obtained.
